# Gimp manual pdf 2018

I have GIMP 2.10.6; however, the PDF manual that I have is ancient; it says GIMP User Manual 2007 and the latest revision is dated 2007. Is this the latest version: -Thus far, I cannot find any way to download it as PDF; can anyone point me in the right direction ? If that one is not available, is a more recent version than the one that I have available in PDF ? Thanks for reading and all help is appreciated. The best you will get at the moment in PDF format is the Gimp 2.8 help from Searchable with an index. Redone earlier this year with the index at the front. 31 MB about 1000 pages 1 Like rich2005: The best you will get at the moment in PDF format is the Gimp 2.8 help Thanks; that is a lot better than what I was finding. Can you enlighten me on what the other choices on that page are ? The reason I want PDF is so I can load it in my Kindle and read it wherever I may be. Thanks again. Since late Nov.2018, there is now the manual for GIMP 2.10 here also (English ... or Italian it seems) 5 Likes Thanks, that really helped [quote="BeeTee, post:4, topic:9738, full:true"] Since late Nov.2018, there is now the manual for GIMP 2.10 here also[/quote] Much appreciated ! You are here: Forums Help & Support Gimp 2.8 user manual 5 of 5 messages available postings 13 contact Can I get a Gimp 2.8 user manual? Depends on what your OS is - Windows - Linux - OSX Your required language and if you want it as a local installation.Windows see: about half way down the pageLinux - look in your package managerOSX - unlikely to get one or for any OS: see the next bitFor English, a good option is Gimp help in PDF format. postings 13 contact Depends on what your OS is - Windows - Linux - OSX Your required language and if you want it as a local installation.Windows see: about half way down the pageLinux - look in your package managerOSX - unlikely to get one or for any OS: see the next bitFor English, a good option is Gimp help in PDF format. The current stable release of GIMP is 2.10.30 (2021-12-19). Show downloads for GNU/Linux | macOS | Microsoft Windows | All (we think your OS is ... Well, we don't actually know. Either JavaScript is disabled, or I am not working quite right... So I am showing you all the options ) Install GIMP Flatpak Warnings and information Flatpak build available in: x86-64 and AArch64 (note: i386 and ARM-32 versions used to be published, yet are now stuck at GIMP 2.10.14 and 2.10.22 respectively). If available, the official package from your Unix-like distribution is the recommended method of installing GIMP! The flatpak build is new and has known limitations, though it will likely provide faster updates, following GIMP releases closely. Therefore choose your installation medium according to your needs. Pssst... want to check out the GIMP 2.99.10 development release? Get it on our development downloads page . Flatpak additional instructions The flatpak link above should open your software installer and prompt you to install GIMP. Yet it may not work out-of-the-box on some platforms since the flatpak technology is new. If that is the case, ensure flatpak is installed and if clicking the link still does not prompt to install GIMP, then manually install by command line: flatpak install Once installed, it will be made available exactly the same way as other applications (menus, desktop overview, or any specific application launch process used by your desktop). If this is not the case, we suggest to report a bug to your desktop or distribution asking for proper support of flatpak. In the meantime, you can still run it by command line (not as the recommended method, only a workaround): flatpak run org.gimp.GIMP//stable This installation will also provide regular update. You don't have to come back on this page and install again (it will not work!) when a new version of GIMP is released. Instead if your distribution and/or desktop has a good support for flatpak, it should propose to perform updates. Once again, if your distribution does not have proper support, you can always fall back to using the following command line: flatpak update Systems without flatpak support GIMP can also run on Solaris and is available for the BSD family of systems such as FreeBSD and OpenBSD. Please refer to the documentation for your Unix-like system on the installation of software. Download GIMP 2.10.30 via BitTorrent Download GIMP 2.10.30 directly The download links above will attempt to download GIMP from one of our trusted mirror servers. If the mirrors do not work or you would rather download directly from our server, you can get the direct download here. Warnings and information Supported OS: macOS 10.12 Sierra or newer IMPORTANT! ⚠ App Store: GIMP team does not provide any downloads using Apple's App Store at the moment. Any downloads on the store are created by third party and is not in anyway connected to the GIMP team. Since version 2.8.2, GIMP runs on macOS/OSX natively. No X11 environment is required. Pssst... want to check out the GIMP 2.99.10 development release? Get it on our development downloads page . Native build The official GIMP 2.10 DMG installer (linked above) is a stock GIMP build without any add-ons. Just open the downloaded DMG and drag and drop GIMP into your "Applications" folder. The SHA256 hash sum for gimp-2.10.30-x86\_64.dmg is: 6f9e0384882bc176699e4f85950971c264c21328d98226f8c7fe9da7e55b932c Check it on VirusTotal: gimp-2.10.30-x86\_64.dmg Older Downloads Previous installers for macOS/OSX can be found here: download.gimp.org. Third Party Downloads Third party packages are not officially supported by the GIMP project. Therefore you should report issues to the packagers first, before reporting to the GIMP team. We only list some of these package systems here because they are widely used FLOSS projects, though we won't list projects providing very outdated versions. Macports An easy way to compile and install GIMP and other great Free software on your Mac is by using Macports. The installer allows you to choose from a large directory of packages. To install gimp using Macports, you simply do sudo port install gimp once you have Macports installed. Last we checked, the GIMP port file pointed to the current stable release and we have reports from people who've built GIMP successfully this way. Homebrew Homebrew is similar to Macports and provides packages (aka formulas) to install, either by compiling them from source or by using pre-made binaries. There are indications that there is now a formula for GIMP, installable with: brew tap homebrew/cask && brew install --cask gimp. NOTE! Please be aware that it was announced recently that Homebrew is using analytics. To turn this off, run: brew analytics off You can read more about this on Brew Analytics. Download GIMP 2.10.30 via BitTorrent Download GIMP 2.10.30 directly The download links above will attempt to download GIMP from one of our trusted mirror servers. If the mirrors do not work or you would rather download directly from our server, you can get the direct download here. Warnings and information Supported OS: Windows 7 or newer These links download the official GIMP installer for Windows (~250 MB). The installer contains both 32-bit and 64-bit versions of GIMP, and will automatically use the appropriate one. BitTorrent is a peer-to-peer file sharing system. It works by downloading GIMP from a distributed network of BitTorrent users, and may improve download speed dramatically. Choosing this option will download the torrent file for the GIMP installer. You may need to install a torrent client to make use of this file. Learn more... IMPORTANT! ⚠ Microsoft Store: GIMP team does not provide any downloads using Microsoft Store at the moment. Any downloads on the store are created by third party and is not in anyway connected to the GIMP team. Pssst... want to check out the GIMP 2.99.10 development release? Get it on our development downloads page . Hash Sum The SHA256 hash sum for gimp-2.10.30-setup.exe is: 5b8db574966d2427fa02202b591173905f64806559e37fbdca4654e55b568c8e Check it on VirusTotal: gimp-2.10.30-setup.exe Older Downloads GIMP User Manual These links download language-specific Windows installers for GIMP's local help. By default, they will place the help files with your GIMP installation. Note: GIMP uses online help by default. If you want to use this local help offline, you will need to change GIMP's help settings. In GIMP, select [Edit] > [Preferences] > [Help System] For "User manual", select "Use a locally installed copy" Under "Help Browser", you can choose between your system's web browser and GIMP's help browser plugin (if available). See the online help for more settings. GIMP releases are also available as source tarballs from gimp.org and its mirrors, containing the source code to compile for your system: Hashes of latest releases to check the integrity of the tarballs: gimp-2.10.30.tar.bz2 (sha256): 88815daa76ed744277eeb353355baf116ed2fed2e861495b95135c1d52b67dc gimp-2.10.28.tar.bz2 (sha256): 4f4dc22c11ab5f0266ea2ab55e05775b3a11e198186b47bdab79c9bfa078826 gimp-2.10.24.tar.bz2 (sha256): b41bb762368c0d4d3175c05006812dd676949c3707e21f4e6857435cb435989e gimp-2.10.22.tar.bz2 (sha256): 2db84b57f3778d80b3466d7c21a21d22c315c7b062de2883cbaaed9a0f618bb gimp-2.10.20.tar.bz2 (sha256): e1219f874b1a007c4277b60a81e0b97330be7e6153e5749ead839d902fc7b3c gimp-2.10.18.tar.bz2 (sha256): 65bfe111e8eebf843dde3016cc6507f9948d2663d9497cb438d9bb509e11d716 gimp-2.10.16.tar.bz2 (sha256): cb9fe9534b913a9487b00cd97110cb569bfd71fd4288c321547701a7a70cbeb gimp-2.10.14.tar.bz2 (sha256): d49b0f11c2078ea1de3ebc66529a5d3854c5e28636cd25a8d077bd9d6ddc54 gimp-2.10.12.tar.bz2 (sha256): 7480b58e0784120d57d3272946fa1da281f51a61935c2cd764da281aacac71 gimp-2.10.10.tar.bz2 (sha256): 12d1f243265c7ae1f2c6e97883a5c90ddc0b19b4346cf822e24adbb6c998c77 gimp-2.10.8.tar.bz2 (sha256): d849c1cf35244938ae82e521b92b720ab48b8e9ed092d5de92c2464ef5244b9b gimp-2.10.6.tar.bz2 (sha256): 4ec8071f828e918384cf7bc7d1219210467c84655123f802bc55a8bf2415101f gimp-2.10.4.tar.bz2 (sha256): ffb0768de14a2631b3d7ed71f283731441a1b48461766c23f0574dce0706f192 gimp-2.10.2.tar.bz2 (sha256): 1cb0baaeccdefe44d371a15f2739a1bcbe4682336b4ccf8eb7b587ce52c333eb gimp-2.10.0.tar.bz2 (sha256): 7fcc96fb88cb0a0595d2610f63a15dec245bb37b9db527d37a24fb75e547de2 For instructions, how to build GIMP from source code, please see this page. You may want to read the Release Notes for GIMP 2.10. User Manual GIMP help files are available at . Development snapshots We now have a separate page for development versions of GIMP. Want to check out the GIMP 2.99.10 development release? Get it on our development downloads page.
